Education

Govt. College of Arts, Science & Commerce, Quepem

May 2020 – Jun 2023

Bachelor of Science (B.S.) in Computer Science

Goa, India

- CGPA: 8.3

Experience

CubikTech

Jan 2025 – Present

Software Engineer

Goa, India

- Architected and developed scalable multi-tenant backend systems and event-driven workflows using Node.js, FastAPI, PostgreSQL, MongoDB, SQS, and EventBridge across fintech, analytics, and automation platforms.
- Built and integrated complex third-party systems including Stripe, Stripe Connect, Razorpay, Salesforce SOQL, Zoho, Twilio, AWS Cognito, and Experian for payments, CRM analytics, authentication, invoicing, and automated operational workflows.
- Designed full-stack production systems with secure RBAC APIs, real-time dashboards, workflow orchestration engines, AWS-based infrastructure, CI/CD pipelines, and scalable cloud deployments reducing significant manual operational overhead.

xAGI

Sep 2023 – Dec 2024

Software Engineer

Bangalore, India

- Built AI-driven full-stack applications using Next.js, Node.js, MongoDB, and LLM integrations, delivering scalable production systems across frontend, backend, and database layers.
- Developed AI chatbots, PDF-based knowledge assistants, and retrieval pipelines for contextual search, conversational workflows, and dynamic content generation.
- Engineered modular APIs, workflow automation systems, and analytics dashboards supporting user management, operational monitoring, and scalable platform features.

WeframeTech

July 2023 – Aug 2023

Frontend Developer Intern

Bangalore, India

- Developed responsive React dashboards and reusable UI components with Chart.js visualizations and Zustand-based state management for scalable frontend workflows.

Projects

Agile Receivables Platform | Next.js, TypeScript, FastAPI, AWS, SQS, EventBridge, Stripe, Stripe Connect, Twilio, Retell

- Architected the backend for an event-driven multi-channel campaign engine using SQS and EventBridge to orchestrate asynchronous email, SMS, and AI voice workflows with isolated multi-tenant processing.
- Built Stripe and Stripe Connect integrations for subscription billing, automated payment routing, and tenant-aware financial workflows; enforced secure RBAC-based multi-tenant isolation using AWS services, Twilio subaccounts, and SES.
- Developed automated AI voice call agents using Retell for outbound debt collection and built QuickBooks/Xero sync pipelines handling 10,000+ invoice operations for automated reconciliation workflows.
- Built the entire frontend from scratch using Next.js App Router with scalable modular architecture, React Flow-based visual workflow builders, Redux Toolkit state management, and optimized data-heavy dashboards with secure Cognito authentication and MFA.

GST Manager Platform | Next.js, Node.js, Express.js, PostgreSQL, MongoDB, Razorpay, AWS S3, Socket.io, Firebase, Redux Toolkit

- Architected a multi-tenant GST filing and compliance platform with RBAC, real-time Socket.io notifications, Firebase push notifications, and isolated tenant data across PostgreSQL and MongoDB.
- Built end-to-end Razorpay payment infrastructure for one-time and subscription workflows with automated invoicing, reconciliation, JWT authentication, and transactional email systems.
- Developed full-stack admin and customer applications from scratch using Next.js, Redux Toolkit, TailwindCSS, and Radix UI with optimized analytics dashboards and real-time WebSocket updates.

- Engineered AWS S3-based document management, GST reconciliation analytics, activity logging, automated compliance workflows, and multi-step prospect/customer lifecycle systems.

Analytics Platform | *Next.js, Express.js, PostgreSQL, Sequelize, Salesforce SOQL, AWS S3, SendGrid, Redux Toolkit*

- Engineered a multi-tenant Salesforce CRM integration layer using direct SOQL queries for real-time access to Accounts, Opportunities, Tasks, and custom objects with RBAC-based data isolation.
- Developed advanced sales analytics systems including leaderboard computation, pacing analysis, quota attainment tracking, forecast trending, and performance reporting across sales teams.
- Built a full-stack responsive analytics dashboard using Next.js, Redux Toolkit, and FullCalendar with real-time reporting, JWT authentication, SendGrid notifications, and AWS S3 presigned uploads.
- Created a flexible JSON-based weekly reporting engine with narrative insights, PDF/image export workflows, and scalable APIs for multi-tenant sales operations.

Technical Skills

Languages: TypeScript, JavaScript, Python

Frontend: React, Next.js (App Router), Redux Toolkit, React Query, Tailwind CSS, Zustand, React Flow

Backend: Node.js, Express, FastAPI, REST APIs, Event-Driven Architecture

Databases: PostgreSQL, MongoDB, Supabase, MySQL

Cloud & Infrastructure: AWS (Amplify, Cognito), Railway, CI/CD

Integrations: Razorpay, Salesforce (SOQL), Zoho, Experian APIs, Twilio, Mailgun

AI & Data: OpenAI, LLM Integrations, Retrieval Systems, Vector Databases (Pinecone)

Tools: Git, Figma, Postman
