Education

Govt. College of Arts, Science & Commerce, Quepem

May 2020 – Jun 2023

Bachelor of Science (B.S.) in Computer Science

Goa, India

- CGPA: 8.3

Experience

CubikTech

Jan 2025 – Present

Software Engineer

Goa, India

- Led end-to-end development of multiple full-stack products across fintech, analytics, and automation systems, owning frontend, backend, database design, and deployments on AWS and Railway.
- Architected scalable multi-tenant and event-driven systems, integrating third-party services such as Stripe, Razorpay, Salesforce, Zoho, and Experian for payments, analytics, invoicing, and credit decisioning workflows.
- Built data-intensive dashboards and automation pipelines enabling real-time analytics, workflow orchestration, and operational tooling, significantly reducing manual processing across critical workflows.
- Designed and deployed production-ready infrastructure, managing CI/CD, secure APIs, authentication systems using AWS Cognito (MFA), and performance optimizations for scalable and reliable applications.

xAGI

Sep 2023 – Dec 2024

Software Engineer

Bangalore, India

- Built AI-driven web applications using Next.js, Node.js, and MongoDB, delivering end-to-end product features across frontend, backend, and database layers for scalable production systems.
- Developed AI chatbots and document-based assistants, including PDF interaction systems and knowledge retrieval pipelines using LLM integrations for contextual search and conversational interfaces.
- Engineered modular APIs and full-stack architectures supporting dynamic content generation, workflow automation, and user-centric product features across internal platforms.
- Designed and implemented admin dashboards and analytics systems to monitor users, content, and platform activity, enabling data-driven operational decisions.

WeframeTech

July 2023 – Aug 2023

Frontend Developer Intern

Bangalore, India

- Developed UI components and interactive dashboards using React and Chart.js, improving data visualization and usability.
- Implemented Zustand for lightweight and scalable state management across the application.

Projects

Agile Receivables Platform (Frontend) | Next.js, TypeScript, Redux Toolkit, React Query, Tailwind, AWS Amplify, Cognito, React Flow

- Built the entire frontend from scratch using Next.js App Router with a scalable, modular architecture and reusable UI systems.
- Developed a visual workflow builder using React Flow for node-based campaign orchestration (email, SMS, voice) with real-time configuration.
- Implemented secure authentication (AWS Cognito, MFA) and optimized data-heavy dashboards with efficient state management.

GST Manager Platform | Next.js, Node.js, PostgreSQL, Razorpay, AWS, Zoho

- Architected and built a full-stack GST service platform including customer app, admin dashboard, and backend workflows.
- Integrated Razorpay payments and Zoho systems for automated invoicing, reconciliation, and service lifecycle management.
- Designed scalable APIs with RBAC and workflow-driven architecture for compliance tracking and operations.

Kreditfin Credit Decisioning Platform | FastAPI, Python, PostgreSQL, Next.js, Railway, Experian

- Built a full-stack credit underwriting system with FastAPI backend, admin panel, and loan decision workflows.

- Integrated Experian APIs to process CIBIL reports into structured financial insights for risk-based decisioning.
- Designed scalable pipelines for lead scoring, document handling, and automated credit evaluation.

Workweek Analytics Platform | *Next.js, Node.js, PostgreSQL, Salesforce SOQL, AWS*

- Developed a sales analytics platform integrating Salesforce data for real-time dashboards and revenue forecasting.
- Optimized data pipelines by replacing cron jobs with direct SOQL queries, enabling real-time insights and reducing system complexity.
- Built multi-tenant backend with RBAC and scalable APIs for reporting and performance tracking.

Startup Nalanda / Learning Platform | *Next.js, TypeScript, Supabase, OpenAI, AWS*

- Built an AI-powered learning platform generating structured courses, quizzes, and resources using LLM pipelines.
- Developed full-stack systems for course creation, user progress tracking, and secure content delivery.
- Implemented gamification systems including credits, referrals, and engagement tracking.

Technical Skills

Languages: TypeScript, JavaScript, Python

Frontend: React, Next.js (App Router), Redux Toolkit, React Query, Tailwind CSS, Zustand, React Flow

Backend: Node.js, Express, FastAPI, REST APIs, Event-Driven Architecture

Databases: PostgreSQL, MongoDB, Supabase, MySQL

Cloud & Infrastructure: AWS (Amplify, Cognito), Railway, CI/CD

Integrations: Razorpay, Salesforce (SOQL), Zoho, Experian APIs, Twilio, Mailgun

AI & Data: OpenAI, LLM Integrations, Retrieval Systems, Vector Databases (Pinecone)

Tools: Git, Figma, Postman
